

ATTN: Hiring Authority

Steve C. Talbot
3237 North Lavergne Avenue
Apartment 1R
Chicago, Illinois 60641-4244

I am a graduate of Illinois Institute of Technology with a Master's in Computer Science degree and a Master's of Science in Mechanical Engineering degree. I am a graduate of the University of Texas at Austin with a Bachelor's of Science in Mechanical Engineering degree. I am seeking a position as a software engineer.

My career has consisted of several technical opportunities in a wide array of disciplines, but always with the focus of improving myself toward achieving technical excellence. I have focused on engineering computing and design, including a software internship and job, two separate graduate engineering research internships, and engineering jobs. I worked for Prominent Capital Group Software, Inc. (PCGSW) as a Software Engineer, coding JSP, JSF, XML and Java and designing and performing integration tests. My engineering jobs have consisted of developing automated machining CAD threadforms and processing product orders. At these jobs I learned to design on-the-fly at the computer instead of on paper, but also to carefully track detailed purchase orders and manufacturing plan routers.

My engineering research has consisted of work at A. Finkl & Sons Steel Refinery, studying the statistical variability of industrial-capacity Brinell Hardness Tester rigs, and with Scot Forge to study the Hot Ductility material properties of 410 stainless steel in a Gleeble 3500 thermomechanical simulator. Research taught me to take responsibility for my analyses and to search for solutions from many different disciplines.

I have a passion for science and technology, and I am always willing to tackle a new challenge.

If you have any questions, feel free to contact me at (847) 436-0815 or email me at talbste@iit.edu.
